

COLLEGE BEST PRACTICES

YEAR 2020

Use of ICT solutions: During the Covid-19 pandemic like other social sectors, educational sector was also badly hit. It became quite difficult for the college to continue its routine class work, examinations and other academic activities. Due to lack of optimum digital infrastructure and the urgency of the situation, College faculty made timely use of online platforms-mostly free ones or those requiring nominal subscriptions- like Google Classrooms, Google Forms, Google Meet, Zoom etc. which solved the immediate problem of maintaining contact with the students and timely conduct of online examinations. The practice of using these tools has now got normalized and use of these tools has become an integral part of routine work. Google forms are now routinely used for the collection of information, registration for events, seeking feedback etc.

Relief Camp for Stranded People during Covid-19 Pandemic-: College took the initiative of lending helping hand to the people stranded in the district Pulwama due to Covid-19 pandemic by facilitating the establishment of a relief camp in collaboration with district administration. College mobilized various external and internal sources-men and material- for procuring kerosene, Gas, food items etc for them. The ration and other articles of necessity were requisitioned from the district administration and accordingly put to use for the people in the camp. More than 350 people including migrant labourers etc. were helped during their stay in the camp.
